

Inspection Manager Goes Mobile

Inspection Manager.NET Mobile—the newest generation of software for Windows Mobile PC Devices and Tablet computers!

Now you can be more productive in the field when performing inspections, quality assurance, and task management.

Inspection Manager Mobile, allows you to capture pictures, create sketches, track jobs, update Job status and close jobs in the field (You can also capture a signature after the inspection is complete.)

More Convenient and easy to use

Windows Mobile PC platform makes Inspection Manager Mobile easy to learn and it works with all Windows Mobile 5 and newer devices. Point and click menus, allow for easy use in the field, view your schedule with one click of a button.

Menu Driven - It's simple to use, point and tap and the system takes you where you need to go!

Schedule - Schedule and conduct Inspections, create work orders and schedule for your technicians. Update scheduled events for your outside service team.

Inspections - Manage your inspections in the field, add new inspection formats to jobs on the fly. Capture sketches and pictures, and print summary and detailed reports in the Field.

Jobs - Create new lists, add new requests to existing work orders, schedule vendors and complete work requests.

Signatures - Capture signatures from customers on work requests. Complete work in the field, capture a signature and sync with the main system, the work order is now complete and signed off.

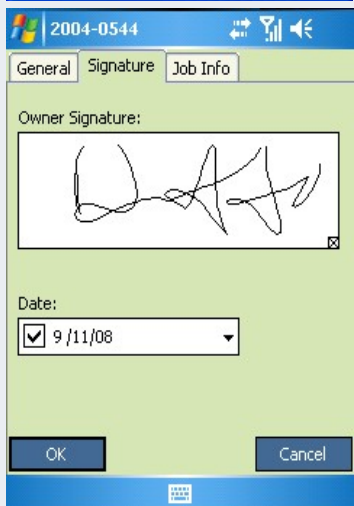

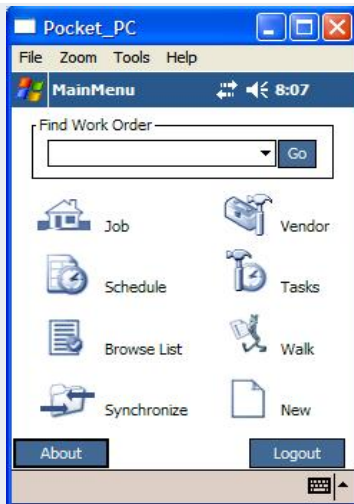

GPS Tracking - Know where your team is and where they have been using GPS tracking by Inspection Manager.

Versatility that gives you more freedom!

Store your data and synchronize it - From anywhere, either using a standard docking station, or any number of wireless options.
